

DT5 Diesel Treatment MBL8 Oil Concentrate Testimony

Until recently one of the **tractors** on our farm, a 1997 AGCO ALLIS 8610 with a 103 h.p. motor **smoked badly and idled roughly**. We were introduced to the Pro-Ma Performance Products Range in November 1997. After a few weeks we noticed two major results with this tractor.

1. **After about six weeks the smoky exhaust cleared right up.**
2. **The idle ran smooth.**

To achieve these results we used both the **Pro-Ma DT 5 Diesel Treatment** and the Pro-Ma **MBL8 Oil Concentrate** in the engine.

We are extremely pleased with the results and we recommend these products to anyone with farm equipment.
