CUSTOMER**

We have a 1470 Case tractor which when we are seeding pulls a 60' seeding drill. The tank would usually last for about 12 hours before it was empty. Since using the Pro-Ma diesel treatment pulling the same equipment, we have noticed that a tank is lasting 18 hours! This is a huge saving, not to mention the convenience of being able to operate longer between stopping to fill. Also, the 92/40 Case tractor with a Case/Cummins Consolidated Engine of 234 hp. would run on full load for two days at 18 hours a day. It now runs three days at 18 hours a day! Whatever this fuel treatment does its doing well—Great Product!
