

# DT5 Diesel Treatment Testimony

I first used Pro-Ma treatment in September of this year. I was not impressed what-so-ever and told Debbie that the next time I saw her at West Edmonton Truckland. She insisted that the product worked and that I had not used enough to see the benefits that it would give me.

Against my better judgment I took a 4 litre jug of **DT 5 Diesel Treatment** from her and left on my trip. I was quite upset with myself that I had allowed her to convince me to try again and I took it out on my truck.

When I came back I did a comparison as to what happened. On a trip without using the diesel treatment I was pulling a tandem trailer with a gross weight of 33,480 kg and averaged 6.05 mpg. On the same trip using the Pro-Ma Diesel Treatment pulling a B-Train at a gross weight of 34,750 kg and driving 10km per hour faster I averaged 6.5 mpg. That is an **increase of almost \_ mile per gallon** which is what I was told to expect after the cleaning process had taken place.

**Actual dollar savings worked out to be about \$18.00 on 1000 miles.**

My truck has a 425 manual Cat engine and had an inframe about 70,000 km ago.

**What can I say, the products work!**
