SATISFIED
CUSTOMER**

Dear Sir,

Our 2050 Cockshot (front wheel assist tractor) has a 118 h.p. Hercules engine. Before using the Pro-Ma diesel treatment it was hard to start even after pre-heating for one minute. It would crank for at least half a minute before it would fire, run for about 3-4 seconds, then stop. This would be repeated for 2-3 times before she would operate properly but it still had a distinct miss.

After using the Pro-Ma diesel treatment for three or four days, the tractor now starts within two revs. of the engine and runs without a miss. We have been using the treatment since March. This is just another example of the tremendous results we have had with the Pro-Ma Performance Products.

Wish we knew about them years ago!
