

GT5 Gasoline Treatment & MBL8 Concentrate Testimony

Re: Gasoline Treatment
MBL8 Concentrate

1980 Chevy Pickup with 118,000 km on engine.

A couple of very exciting things have happened when I started using the Pro-Ma **GT5 Gasoline Treatment** and the **MBL8 Concentrate** in my pickup. One thing that I noticed was that my **truck didn't seem to smoke even when it was cold. Easier starting** was also quite evident especially during the minus 30 weather that we got much of this past winter. **My engine RPM increased though the engine seemed to be running smoother.** I don't keep track of my gas mileage, but I sure didn't have to fill up as often so obviously I was getting **better mileage.**

I recommend the Pro-Ma Performance Products for everyone who drives a vehicle.

Yours truly,

Jerry Reeves
