

# GT5 Gasoline Treatment & MBL8 Oil Concentrate Testimony

I own a 1986 Volvo 240DL Station Wagon, which when I bought it had 305,000 kilometers on the odometer. I previously owned a Volvo as well, so I am quite familiar with these vehicles. The vehicle wasn't idling as well as I would like and starting in the cold (-25°) was never easy. Before adding the Pro-Ma Performance Products, I was getting approximately 340 kilometers per tank.

Since adding the **MBL8 Oil Concentrate** to the engine oil and the **GT5 Gas Treatment** to the fuel I am **very pleased with the results. The engine now has 320,000 kms on the odometer and idles smooth. Starting in the cold is easier and the car is returning over 450 kms per tank. This means big savings to me.**

The Pro-Ma products return much more than the investment to use them.

Sincerely,
