

# GT5 Gasoline Treatment Testimony

In early Spring a few years ago, I was trying to start my **chain saw**. It just would not start! I had not used it in 3 years and never changed the spark plugs in 14 years. I thought I had nothing to lose, so I TRIPLE DOSED with **Pro-Ma GT5** directly into the chain saw instead of taking it apart. To my amazement it started after 2 or 3 pulls.

Then I put the GT5 in the gas can with the chain saw fuel mix, which was as old as the fuel in the chain saw. I have since used up all the old fuel and the **chain saw is still running smoothly today**.

Thanks to Arthur & Lyn Knight for introducing Colleen & I into a great product line and a great business!

Yours truly,
