Dear Arthur,

As you know, because of your recommendation, my family and I have been using the Pro Ma Gas treatment in our vehicles, the MBL Spray and the Maxi Sheen for vinyl and rubber items and the Dri-Kleen as a waterless car wash and polish. For the past several years I have also operated a Sears carpet cleaning business part time and found nothing would compare to the Pro Ma Citrus Cleaner for general carpet and furniture cleaning and spot removal. However my latest test for the gas treatment left even me amazed! I own a Mastercraft lawn mower with a 4 H.P. Briggs and Stratton motor. After last Fall it was stored over our very long, cold winter in a garden shed. I did not drain the fuel but I did have the gas treatment in it. This month it was taken out to cut our lawns and without doing anything other than priming the carburettor with the little pump on the side, the motor burst into life with just one pull! I was amazed! It did not miss a beat during the entire lawn cutting episode even when it was shut off to move to the back yard, one pull and it was running again. This truly indicates to me the quality of the Gas Treatment's fuel conditioner properties - Good Product!
