

GT5 Concentrated Gasoline Additive Testimony

Enjoying the great outdoors, as a guide for some local ski-doo enthusiasts has become a side benefit in selling **Pro-Ma Systems Performance Products**.

On a recent trip one ski-doo was **overheating** and we were forced to stop every 20 minutes to one half hour. Walking up to the operator of the distressed machine I said I had some GT5 on me which should help. The driver Ray Douglas, became very excited when after three hours of running, it was not overheating as it had before. I told him I didn't believe it could be the GT5 working so soon. I expected it to work through a full tank of gas before noticing results. But exceeding all expectations, we ran 160 miles to the finish without stopping again.

At the end of the trip, Ray, with great exuberance said, "Where can I get some of that stuff?"

Not missing a beat, I responded "I am the man!!"

That trip resulted in some sales of product, inquiries for more information, and Ray saying he couldn't wait to try the products on his trucks. He is part owner of a trucking firm out of Winnipeg.

The "PERFORMANCE" in Pro-Ma Performance Products sells!!
