In April 1993, a friend of mine suggested I try a grease called Pro-Ma M.B.L. grease on some of our Rural Municipality machinery. We had recently been testing another product which certainly was better than the grease we had used previously, but he assured me we would find the Pro-Ma MBL not only better, but cheaper in the long run because of its ability to lubricate better and longer in any conditions. I decided to test it on the circle turn for the blade of a Champion 730A road grader. The original grease would only last one day before requiring regreasing, the later grease we were testing lasted approximately three days before requiring regreasing.

The Pro-Ma MBL grease so far has lasted 19 days!! And is still going strong. The circle turn has not jammed up or become noisy! As this machine is operated for up to eight hours a day in very dusty conditions. We really are pleased with the result and I would recommend this Pro-Ma MBL grease to anyone!
