

PERFORMANCE PRODUCTS

The hydrostatic transmission which operates via a clutch valve in our 1026 International tractor never operated properly for four years. It would not re-engage without a harsh noise and jerking. We were really reluctant to use it. In March, we were introduced to a product made by Pro-Ma called on MBL oil supplement. We put this into this transmission oil at the recommended rate and found that in a short time the pedal became free to clutch and de-clutch the transmission. We can now use the transmission again. This product really works!

We have a 766 International tractor which had a very noisy Bosch fuel pump. It clattered loudly at idle. I treated the 500 gallon bulk tanks with Pro-Ma diesel treatment and after a day or two asked the operator of the tractor if he had noticed any change in operation of the tractor—he did not know I was using a fuel conditioner. He told me that he had noticed that the fuel pump had quietened down dramatically by at least 75%. I don't know what it did, but the Pro-Ma fuel treatment did something to quiet down the pump.

I'm impressed!
