We have operated eight multi-leg centre pivot sprays for irrigating our lucerne and low grass fields for many years. The maintenance on the gear boxes (two per leg) was very high due to moisture getting into the gear boxes and corrosion from the salt air. Our largest pivot covers an area of 483 acres. Overhauling of the gear boxes was a consistent outlay—full repair of one box amounted up to \$1,800.00. Twelve months ago Mr. Knight introduced our farm to the Pro-Ma lubricant products. A little skeptical we did as he suggested and packed the drive bearings with MBL grease as well as smearing the grease on the drive cogs in the boxes. We also added at 20 ml/litre MBL Concentrate to the gear oil. In this time we have not had to replace a seal, bearing or drive to any box. These two products have saved, I estimate, thousands of dollars in repairs to our Dairy Farm. We recommend these products to anyone experiencing costly maintenance repairs.
