LONGWOOD, FL: USA 32750

Dear Sirs,

As is often the case, people seldom take the time to say Thank You. I am writing this letter to tell you how very pleased I am with your products and service.

Currently, I am the Maintenance Supervisor and my responsibilities include maintaining and servicing our equipment. I'm sure you are aware that our equipment runs under the most demanding type of environmental and stressful conditions. I am happy to report that your MBL Lubricants are incredible! They have out performed any other lubricants that I have encountered. For example:

- a. One of our twin screw machines, for washing stone, runs approx. 15 hours per day. Since using MBL Grease we have cut the noise dramatically, and have noted that we grease less frequently.
- b. We have also noted that we have cut the noise level dramatically in our speed reducers, but more important, the operating temperature has been lowered considerably.
- c. In our primary crusher, which crushes 500 ton per hour, we have been using the MBL8 Oil Concentrate for 2 years on 1,373,000 tons. We have had NO BREAKDOWNS in the bearing that we used to replace, every 300,000 tons. There is less noise and the temperature has lowered.

In conclusion, I cannot express in words how impressed we are with your products. We are convinced, that we are saving an incredible amount of dollars on our maintenance and downtime, thanks th PRO MA PERFORMANCE PRODUCTS!!

Sincerely,

Carl Carrier  
Maintenance Supervisor
