

# PERFORMANCE PRODUCTS

## HIGH PERFORMANCE TESTIMONIAL

“ During the years that my wife and I have been involved in Drag Racing we have seen a lot of additives and always remained sceptical as to their benefits. But since using Pro-Ma Performance Products MBL Concentrate, engine life has increased with the end result being less rebuilds. The MBL has helped maintain high oil pressure and dramatically reduced wear on rockers and pushrods. This has meant a dramatic saving in repairs and down time.

The Pro-Ma Performance Products Gas Treatment has also controlled water build up in the fuel system and helped prevent condensation in the fuel lines due to the nature of methanol.

The Gas Treatment also keeps the injectors clean. We use the Maxi Dri-Kleen exclusively to keep our vehicle in top show condition. As we have now become distributors, we have no hesitation in a two fold recommendation.

1. Great savings in repairs, maintenance and down time.
2. The chance to earn extra income with a top range of products.”
