

PERFORMANCE PRODUCTS

HIGH PERFORMANCE TESTIMONIAL

"We have been using the Pro-Ma Performance Products in our Harleys at U.S. Cycles for over 2 years with significant results. The main problems we experience in drag bike racing is extreme load and pressure on bearings, cams and rockers. Our greatest area of concern prior to using the Pro-Ma Products was piston pick up in the bore. This is now no longer a problem. After adding MBL Concentrate the pick up problem was cured. We have dramatically reduced overhaul frequency. In fact we believe we have effectively doubled engine life with the use of MBL Concentrate. We also use the concentrate in the Blower Gearbox. The MBL Grease is used in the rocker assemblies, wheel bearings and steering head bearings. The MBL Spray is used on the chain and linkages. To keep the bike in top show condition we use the Maxi Dri-Kleen. The Diesel Treatment and Concentrate are also used in our Isuzu Transporter to offer us reliability and increase fuel economy. I would have no problem in recommending any of the Pro-Ma Performance Products to anyone who races or just enjoys their vehicle. These products perform as stated."
